

Marylle Broñola Laguna

Software Engineer

0999-787-9184 | maryllelagunaa@gmail.com | Baybay City Leyte, PH

Seeking an opportunity to develop web development skills, gain hands-on experience, and contribute to meaningful projects in a dynamic and learning-focused environment.

EDUCATION

Visayas State University – Main Campus (Baybay City Leyte, PH)

Aug 2022 – present

Bachelor of Science in Computer Science

- Relevant Coursework: Software Engineer 1 (2025), Application Development (2025), Object Oriented Programming (2024), Fundamental of Database Management (2024)
- Member of the VSU Computer Science Students Society

PROJECTS

Project Manager & Co-Developer – Ontrack

2026

- Directed the overall planning, execution, and monitoring of a web-based project tracking platform, managing a 3-member team to deliver core software modules across a 10-week development timeline, while executing Quality Assurance test cases prior to launch.
- Co-developed the platform's core follow feature to deliver automated real-time updates and designed a user-friendly UI supporting 3 distinct user roles (Viewers, Project Managers, and Admins) to ensure seamless navigation.

Web Development – BrainBento

2025

- Developed and deployed a comprehensive web-based exam reviewer utilizing Next.js, Typescript, and Tailwind CSS with shadcn/ui components, designed to optimize student study habits and enhance information retention.
- Engineered core features including 10+ structured review modules and over 200+ interactive flashcards, while integrating Supabase for secure user authentication and PostgreSQL database queries.

Application Development – Talk A Boo

2025

- Collaborated with a team of 5 members to develop and launch a mobile application on Google Play that enables users to share, publish, and explore supernatural stories globally.
- Implemented core storytelling features supporting over 100+ user-generated posts and designed an intuitive UI that streamlined story discovery, contribution, and interaction, driving engagement for both new and returning users.

Backend Development – Student Record Database

2024

- Built an efficient student record database utilizing MySQL and C#, resulting in a streamlined system that managed over 1,500 student records while enhancing data integrity through robust normalization techniques.
- Applied effective normalization techniques to improve data integrity and optimize query performance, leading to noticeably faster response times for database transactions.

SKILLS

- **Programming Languages Learned:** C, C++, Java, C#
- **Web Technologies:** HTML, CSS
- **Backend and Database:** Supabase, PostgreSQL, MySQL (Basic)
- **Tools and Frameworks:** Git, GitHub, VS code, Figma, Tailwind CSS

LEADERSHIP

Information Management Research Leader

2024

- Led a 5-member development team for the Students Performance Data Processing and Analysis research project, tackling key data accuracy challenges and completing all deliverables two weeks ahead of schedule.

- Streamlined stakeholder communication by structuring detailed project documentation, timelines, and status reports, ensuring that critical updates were disseminated within 24 hours of completion.
-

Minimum Qualifications

- Degree in Computer Science, Information Technology, or any computer related.
- Solid understanding of HTML, CSS, and JavaScript.
- Knowledge and experience in React.js, Express.js, and Node.js are Preferred.
- Proficient with at least one programming language like Java, PHP, Python, etc...
- Familiarity with database technologies such as MySQL, Oracle, and MongoDB.
- Familiarity with version control such as Git.
- Familiarity with mobile development is a plus.
- Familiarity with Android Studio or Xcode is an advantage.
- Understanding the end-to-end process of publishing applications on the Google Play Store and Apple App Store is highly desirable.
- Strong organizational and project management skills.
- Excellent verbal communication skills.
- Good problem-solving skills.
- Attention to detail.
